

De acuerdo a la revisión del código, aún están pendiente subsanar los lineamientos de seguridad. Solo se agregó los tres archivos .php que pasé dentro del directorio / inc pero no está implementado. Están pendientes las siguientes tareas a realizar:

1. Limpiar código sin uso dentro del archivo funtions.php.
2. Llamar, invocar los tres archivos dentro del funtions.php (no deben estar comentados)

The screenshot shows a file explorer and a code editor. The file explorer on the left lists the directory structure under 'themes/ferreycorp-tema'. The 'inc' folder contains several PHP files: security-csp-fixs.php, security-csp.php, security.php, footer.php, functions.php (which is selected and highlighted with a red border), header.php, index.php, page-template-home.php, style.css, and index.php. The code editor on the right displays the contents of 'functions.php'. The code includes logic to unset specific endpoints and return the \$endpoints array. A red rectangular box highlights the commented-out require statements for security, security-csp, and security-csp-fixs files. The code is written in Spanish, explaining it gets a robust environment variable.

```
17 |     \ endpoints[ 'wp/v2/users/(\?P<id>[\d]+)' ] ) );
18 |
19 |     unset( $endpoints[ '/wp/v2/users/(\?P<id>[\d]+)' ] );
20 |
21 | );
22 //require get_template_directory() . '/inc/security.php';
23 //require get_template_directory() . '/inc/security-csp.php';
24 //require get_template_directory() . '/inc/security-csp-fixs.php';
25 |
26 */
27 * Obtiene una variable de entorno de forma robusta.
28 */
29 function ferreycorp_get_env( $key, $default = null ) {
```

3. Crear los campos necesarios en el ADMIN CMS del wordpress mediante el plugin ACF, esto porque el archivo security-csp.php está invocando los campos creados con ACF.

```
themes          22

$script_src_elem_str = (string) get_field('csp_script_src_elem', 'option');
```

Ejemplo de Admin CMS

The screenshot shows a Content Security Policy (CSP) configuration page within a web-based administration interface. The left sidebar contains a navigation menu with various options like 'Productos Kits', 'Medios', 'Páginas', etc., and 'Opciones' is highlighted with a red box. The main content area has tabs at the top: 'Home Page', 'Pié de Página', 'Herramientas', 'Parámetros Adicionales', 'Tour 360° Parámetros', 'Configuración Cotizador', 'Content Security Policy' (which is also highlighted with a red box), 'Seguridad', 'Nuevo Cotizador', and 'Industrias'. Below these tabs, there are four sections, each with a red box around its title: 'default_src', 'img_src', 'font_src', and 'script_src'. Each section contains a text input field with specific CSP directives.
